

ptfe sheet ptfe bar ptfe rod pfa sheet pctfe rod ptfe belt ptfe cloth ptfe adhesive tape

Item: **COX Sheet- PTFE Sheet**

Product Name: **PTFE Sheet**

Index of COX Sheet:

Apparent density: 2.1 ~ 2.3 g/cm³

Tensile strength: 14.0Mpa

Ultimate elongation: 150%

Temp: - 180 ~ + 260

Use of the PTFE Sheet:

PTFE Sheet exhibits good strength, abrasion resistance and low friction. **COX Sheet** conforms well to irregular surfaces and offers higher elongation than our high modulus skive PTFE. These **Sheet PTFE** are used widely on printing and duplicating machinery. The electrical insulation used under various kinds of frequency, the seal liner of various kinds of corrosives medium, Anti-sticking materials, lubrication material.

Description of the COX Sheet:

PTFE Sheet manufactured by molding with PTFE granular resin, corrosion-resistant liner, seal, lining and gasket, scrap, guide rail, dielectric material for different frequency, bridge bearing slide.

Sheet PTFE is ideal as a slide surface, for chute liners, other kinds of liners, or for cutting or stamping into **PTFE gasket** and diaphragms, including complex stamped gasket configurations, many pharmaceutical and food processing.

Sheet PTFE has a wax-like surface to which anything hardly sticks. **PTFE Board** has the lowest coefficient of friction of all known solid materials. **Sheet PTFE** has the best electrical properties of all plastic.

COX Plastic
